## **TSC Leverages Latest Mobile Enablement Technology to Enhance Hybrid Workforce Productivity**

*Leading Managed Technology Services  
Provider Advances the Communication  
Capabilities of Local Businesses*

CARBONDALE, CO – September 30, 2022 - TSC, a leading managed technology services provider (MTSP), is advancing how small to mid-sized businesses (SMBs) communicate with one another via mobile enablement technology. Historically, whenever someone left the office, they could reroute calls to their personal cell phone. This worked well in a pinch however, they lost the functionality that they would otherwise have with their office phone. They couldn't transfer a call to other departments, they couldn't check presence to see if other staff were available, they couldn't record calls easily and they wouldn't have access to other key applications. With the rise of remote and hybrid workplaces, TSC invested in offering mobile enablement technology to its customers to enhance business communications and productivity.

"There's been tremendous demand for remote or hybrid workplace communications solutions over the past few years," stated Barry Cryer, President of TSC. "This demand is never

going to slowdown and as a result, businesses will continually need solutions that support their remote staff. Mobile enablement and other ancillary solutions are bridging this gap."

Whenever an employee needs to be remote but available, there's plenty of functionality that is vital. First and foremost, they need to be able to press a button which automatically reroutes all calls their way. Additionally, an employee needs to be able to collaborate with other team members in one-place for group calls or group messages or video and with mobile enablement solutions they can see when other members are available, so they don't waste time with cumbersome "back n' forth" scheduling messages. There are other times where an executive is in transit with poor cell service but can easily scroll on their smartphone to browse important voicemail transcriptions to delegate them to other team members who can provide more immediate assistance. The whole point of mobile enablement solutions is to maintain a seamless, professional experience that drives easy communication and collaboration.

"Hybrid and remote workplaces are here to stay and

without building the proper communications and IT infrastructure, there are obvious shortcomings to the hybrid workplace; however, with the right tools it can accelerate the pace of any business, enhance collaboration and ultimately lead to more profits," added Cryer.

### **ABOUT TECHNOLOGY SYSTEMS CONSULTANTS**

Founded in 1992, Technology Systems Consultants is committed to establishing and maintaining a dynamic partnership with every customer. Extensive technology and service experience allows the TSC team to develop an understanding of each customer's unique telecommunications requirements, and to respond to those requirements quickly and effectively.

TSC's local dispatch center delivers round-the-clock service to ensure system reliability. TSC also offers comprehensive service 24 hours a day, 7 days a week and emergency service guaranteed within 4 hours.
